DETAILED ACTION

Status of the Application

1. The Response filed April 16, 2004 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Status of the Claims

3. Claims 29-76 were pending. Applicants canceled claims 29-76 and added claims 77-96 (e.g., see 9/25/03 Response). Therefore, claims 77-96 are currently pending.

Election/Restriction

4. The species election requirement dated 12/16/03 is withdrawn in view of Applicants' arguments (e.g., see 4/16/04 Response).
5. Therefore, claims 77-96 are examined on the merits in this action.

Withdrawn Objections/Rejections

6. All previous objection and/or rejections are withdrawn in view of Applicants' arguments and/or amendments.

New Rejections

Claims Rejections - 35 U.S.C. 112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 77 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. For **claim 77**, the phrase “employing values of volumes of section of the measurement volume corresponding to a selected set of values of the spatial brightness function” is vague and indefinite. For example, it is not clear what the word “employing” refers to i.e., what are the values of volumes of sections of the measurement volume employed in? Applicants are requested to clarify and/or correct.

B. For **claim 77**, the phrase “considering the volumes as variables depending on modeling parameters of the spatial brightness function” is vague and indefinite. For example, it is not clear what formula Applicants refer to when they say that the volumes are “variables” and also it is not clear what relationship this has with the spatial brightness function i.e., in what way to they “depend” on the modeling parameters of the spatial brightness function and how should the volumes be “considered”? Applicants are requested to clarify and/or correct.

Allowable Subject Matter

Art Unit: 1639

8. No claims are allowed. However, claims 78-96 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated any new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
